What you need to know

You must have veterinary permission before any equine Bowen proceeds. Contact us for a referral form.

- Try to plan sessions so your horse is not shod, wormed or vaccinated for two days either side of treatment
- Keep things low key for up to four days after a session so your horse's body has time to respond
- Avoid using hot or cold treatments for one week after a session
- Following a session it is recommend that your horse is worked on a straight line for a few days (quiet hacking is ideal)
- We recommend that your horse receives 2-3 sessions of Bowen to experience maximum benefits

£45 per session (travel costs may apply based on your location). Get a 15% discount when you pay for two sessions. Discounts also available for two or more horses.

Book a riding session and Bowen session (for you or your horse) and pay £60 for both!
